CLEANED!

READ BEFORE YOU SIGN

Written contracts create mutual obligations. One of the cornerstones of modern commerce is the Contract of Purchase. Written contracts have found their way into human and business relations because their use serves to lessen and to prevent misunderstandings between parties to an agreement.

The purchaser owes it to his pocketbook and his conscience to give SPECIAL ATTENTION to that part of the contract which tells him what he is to get, what he is to pay and when.

Don't sign a contract with your eyes shut. Don't take a salesman's word for everything. Occasionally an employer may make a mistake in the selection of salespersons. That seems to be inevitable in all types of business.

But it lies with the customer whether such a handicap to mutual understanding is to be slight or serious. A salesman may convey misunderstanding through zeal or carelessness or even by intent, but the contract if the customer will read it will usually clear up such divergencies, there it is set down in black and white to prevent misunderstandings.

When a signature appears on a legal contract it is a foregone conclusion that the signer is indicating his or her honorable intention of carrying the matter through to a finish. The whole commercial world of debits and credits is built upon and maintained by the strength of signed legal paper. People who sign contracts without reading them, should swallow their losses in silent chargin.

"THE DOTTED LINE"

This balance should be maintained wherever written agreements are used to record the understanding between Buyer and Seller.
